

Day-one training (25 minutes) · تدريب اليوم الأول (٢٥ دقيقة)

For Ahmed, to run with the owner, Reception and the 1–2 teachers on the first morning. Everything happens in the **practice centre** («مركز تدريب»), with the synthetic sample roster, never in the real data. Speak Arabic; the quotes are the screens' own words.

Before the session (10 minutes, alone)

1. Stop the real server if it runs (Ctrl+C in its window).
2. Run `pnpm pilot:practice`. The first time, it creates the practice centre next to the real data and prints the **owner PIN**: write it down. Then it starts on the usual addresses, so the phones work as they are, and voice is always off.
3. Print the three quick guides (`pnpm pilot:guides` → `docs/pilot/guides/*.pdf`): one per person.
4. Have one teacher phone ready, already set up (phone-setup.md).

The session

Min	Who	What (in the practice centre)	Point to make
0–3	All	Why we are here: the follow-up loop on one page. A teacher confirms a session → a rule raises a follow-up → Reception contacts the guardian from the centre's WhatsApp → the outcome is logged.	Nothing reaches a parent without staff approval. No phone numbers live in Link.
3–7	Owner	«أضف واعرض»: add Reception and a teacher → «الرمز» → hand each PIN over in person.	The PIN is shown once .
7–13	Teacher (on the phone)	Sign in → «أكمل سجل الحصة» → mark attendance with one student «غائب» and leave one unmarked → a score for one student → a short note → «مراجعة قبل الحفظ» → «تأكيد وحفظ السجل». Then do the same for the previous session with the same student absent.	«غير مسجل» is not «غائب». Only confirmed records count.
13–20	Reception (laptop)	«اليوم» → the new follow-up → «صيغ رسالة» → لماذا ظهرت هذه المتابعة → «اعتمد (ثم ترسلها أنت)» → «انسخ الرسالة» → «لولي الأمر» → tick → «أرسلتها من واتساب المركز» → «سجل ردّ وليّ» → «احفظ النتيجة والخطوة التالية» with a made-up reply → «أغلق مع ذكر السبب».	The follow-up stays open after sending: «محاولة: التواصل ليست حلًا».
20–22	Reception	Open a second follow-up and «أغلق مع ذكر السبب».	A reason is required, with no phone numbers or private details in it.
22–24	Owner	«سجل النشاط»: everything they just did is there. The voice card: voice is off by default and switched on per teacher, after the signed consent (it stays off in the practice centre).	Nobody can edit the activity history.
24–25	All	Questions. Who to call. The daily check-in at the end of each day.	

After the session

1. Ctrl+C to stop the practice server.
2. `pnpm pilot:practice-wipe`: deletes the practice centre. It refuses any folder that is not marked as practice, so the real data cannot be deleted by mistake.
3. `pnpm pilot:preflight` → all ☒, then `pnpm pilot:start` for the real pilot.

Practice data never mixes with the real data:

- separate folder;
- `pilot:metrics` refuses the practice folder;
- voice is off there;

- tested in `apps/pilot/test/practice.test.ts`.

The staff will see the practice centre's name («مركز تدريب») in the header, not the real centre's.
